

ARCHITECTURAL METALS

Show your creativity.

PROUD HISTORY, NEW TRADITION

Founded in 1886, Stewart Iron Works has earned a well-deserved reputation for artistry in metal.

That reputation is on display at locations as diverse as the U.S. House of Representatives, the Panama Canal, Bourbon Street and thousands of community landmarks and private properties throughout the country.

A legacy of this experience is one of the world's largest collections of historical, technical and design drawings, which is utilized by our designers and clients for reference and inspiration.

While we are proud of the work we have done, we are most energized by the challenges of metal masterpieces we have yet to create.

What do you dream of creating? Let us help you bring it to life!

railings, fences, teller cages, gates...

RECREATION/ ENTERTAINMENT

Ornamental metalwork sets a welcoming stage that transcends the everyday.

Designed to echo the casino's nautical theme, this custom-designed ship's wheel railing was water-jet cut from a 1/2-inch thick piece of solid brass.

Argosy Casino drew upon our experience to create a sumptuous visual tapestry from a variety of styles and materials.

Creating a setting with timeless appeal is easier when you partner with our team of designers, architects and engineers. We can simplify the process with expertise that covers the scope of your project, from building code requirements and metallurgical compatibility to historic design integrity and technical drawing development. Our Project Manager will work closely with you, your contractor and your client throughout design, modifications and manufacturing, until the product is installed to your—and your client's—satisfaction.

HOSPITALITY

railings, transoms, gates, furniture...

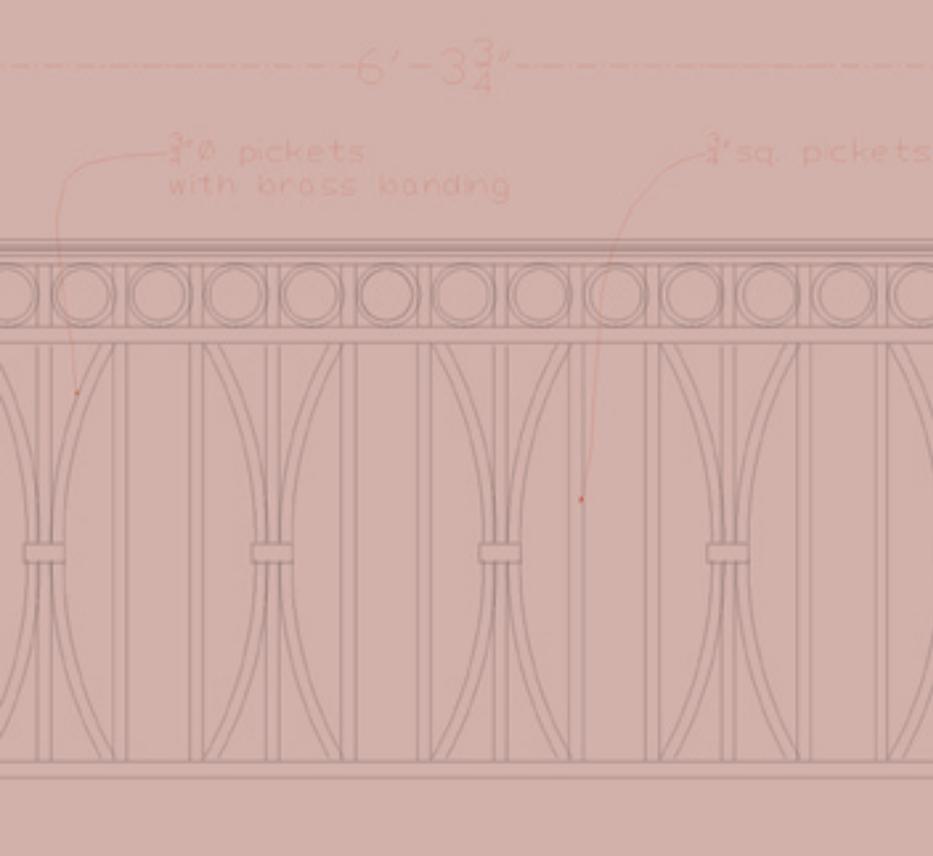

When creating distinctive properties, architectural metals can be used effectively to establish design continuity that can help set a project apart. We can help you weave a unifying artistic thread through a broad range of elements, including public space railings, food and banquet facilities, unique room furnishings, wine cellars, restaurant entryways, metal sculpture, fountains and unique works of art.

From exterior railings and balconies to transom metalwork and amenities, we can create ironwork to complement any theme or style.

Intricate designs can be produced by our team, which includes ironworkers trained in Eastern Europe, where the art of metal craftsmanship is still taught and appreciated.

Curved stairs are a complicated specialty, and we can handle all of the details, from design, casting and manufacturing to assembly and installation.

*Elaborate scrollwork
featuring forged bent
iron is a specialty of our
metal artists.*

In environments where image is essential, you can achieve distinction with architectural metal. Whether it's one-of-a-kind design for a flagship location or signature elements that can be replicated for multiple locations, we eliminate headaches and delays with single-source responsibility and commitment to excellence. Our production controls within defined tolerances enable timely, trouble-free installation.

RETAIL MIXED-USE

accents, gates, furniture, railings...

*Our craftsmen hand
bend and hand weld our
materials, imparting a
custom-made quality that
cannot be reproduced by
assembly line methods.*

Decorative features create focal points and serve to anchor community gathering areas.

CITIES AND

fences, gates, gazebos, benches...

For more than a century, Stewart has helped cities across the United States utilize ironwork to lend the qualities of prosperity and permanence to their visual identity.

COMMUNITIES

The versatility of ironwork can be used to visually integrate gateways, streetscapes and public spaces, enhancing a sense of place and stimulating community pride. Our historical perspective and extensive collection of archival patterns makes us uniquely qualified to undertake both new developments and revitalization projects. From cherished landmarks to comfortable park benches, our work is built to last for generations.

Handled by Stewart from start to finish, this highly decorative Gazebo project transformed an empty site into an attractive multi-use space.

For substance, style and enduring beauty, nothing surpasses solid steel fences and gates. Our craftsmen employ an extensive library of patterns and diverse finial styles to help discerning homeowners achieve the architecturally accurate design they desire. The result is metalwork custom tailored to any neighborhood style or individual taste.

RESIDENTIAL

railings, fences, gates, furniture...

Architectural metal adds a timeless element of elegance and stature to a home.

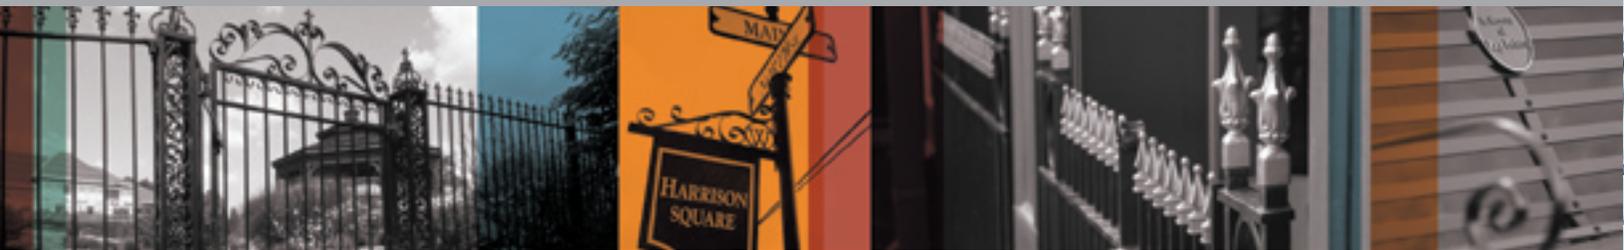

We suggested manufacturing alternatives that enabled this distinctive, homeowner-designed courtyard gate to be created and installed within budgeted allowance.

The restoration of this historic 1847 Greek Revival home included new fence sections custom made to duplicate a remaining section of original fencing.

STEWART
IRON WORKS

MORE THAN HISTORY, MORE THAN FENCES

Heralded at the turn of the twentieth century as the “World’s Largest Fencemaker,” Stewart Iron Works has evolved to become the nation’s foremost provider of handcrafted ironwork.

As such, we occupy a special niche in architectural metals. While we are large enough to offer the capabilities and production capacity of a full-scale commercial metal fabricator, we are artists at heart, eager to help you achieve your personal artistic expression in metal.

Let us bring a touch of exquisite brilliance to your next project.

You imagine it. We’re ready to help you create it.
